- **Programming Language**: T-SQL, C#
- **Scripting Language:** JavaScript, JQuery, ExtJS, React, Angular, Node, Typescript, HTML5
- **RDBMS**: SQL Server, PostgreSQL
- **Development Tools**: Visual Studio, Visual Studio Code, Sublime Text

Skill Highlights

- Agile/Scrum methodology
- Performance and scalability
- Optimization
- API design

Experience

Senior Software Engineer (React/.NET Core) - 09/2021 till now
The Russell Organization (TRO)

   I am working as Senior web developer currently. We are basically developing a workforce management site in which we use React as a front-end and .NET Core as a back-end technology which effectively schedules, manages, and pays temporary workforce. I am working as full stack developer experience in working with React, .NET, MSSQL, JavaScript, JQuery, Mongo DB.

- Maintaining professionalism in areas such as: organizing meetings to make communication easy and transparent regarding project issues schedules, communication, delivery of the product and decisions on implementation.
- Experience in code review and demos.
- Investigation, design, and implement scalable applications for data identification, analysis, retrieval, and indexing.
- Develop high-quality software design and architecture.
- Identify, prioritize, and execute tasks in the software development life cycle.
- Develop tools and applications by producing clean, efficient code.
- Automate tasks through appropriate tools and scripting.

Senior Software Engineer (React/.NET Core) - 01/2018-09/2021
Brain Digit IT Solutions

We developed an e-learning website in which we use React as a front-end and .NET Core as a back-end technology.

- Software design and development while remaining concentrated on client needs.
- Coordinating with other developers with their work, issues, and attendance and providing status updates every week and maintaining a smooth work environment among the team members.
- Involved in decision making about the project's modules like breaking the modules in stories.
- Interface with business analysts, developers, and technical support to determine optimal specifications.

Software Engineer (Angular/Dapper.Net) - 06/2015 to 01/2018
Shangrila MicroSystem

I worked as Web developer in this company. We were basically developing a Taxation system and International Airport management system in which we use Angular as a front-end and .Net Core as a back-end technology. I worked as full stack developer experience in working with Angular, .Net Core, NodeJs, JavaScript, JQuery, Typescript, PostgreSQL for about 3 and half years.

- Consulted regularly with customers on project status, proposals, and technical issues.
- Transformed existing software to correct errors, upgrade interfaces, and improve efficiency.
- Cooperate diligently with other IT team members to plan, design, and develop smart solutions.
- Write modular, secure, and well-tested front-end code in JavaScript framework.
- Perform tasks efficiently and work together with the team to ensure project success.

Education

Bachelors in information management: **Computer Engineering - 2015**
