Summary

Senior Full Stack Software Engineer having more than 6 years of experience in writing modular, secure, and well-tested code. Proficient and mostly worked with .NET Core framework for the backend and React framework for frontend. Supportive and enthusiastic collaborator dedicated to streamlining processes and efficiently resolving project issues.

Technical Skills

- **Microsoft Technologies**: .NET core, Asp.net, Web api, Asp.net MVC4/5, LINQ
- **ORM**: Entity Framework, Dapper.net
- **Programming Language**: T-SQL, C#
- **Scripting Language:** JavaScript, ReactJS, Angular, ExtJS, Node JS, Typescript, JQuery
- **RDBMS**: SQL Server, PostgreSQL
- **Development Tools**: Visual Studio, Visual Studio Code, Sublime Text

Skill Highlights

- Agile/Scrum method
- Performance and scalability
- Optimization
- API design

Experience

Senior Software Engineer (React/.NET Core) - 09/2021 till now
The Russell Organization (TRO)

Currently working as a senior software engineer, developing a workforce management system, which effectively schedules, manages, and pays temporary workforce. Parallelly, supporting and fixing issues for existing deployed systems. We use React as front-end framework, .NET core as backend framework, MSSQL for database management system, Mongo DB for storing logs.

- Maintaining professionalism in areas such as: organizing meetings to make communication easy and transparent about project issues schedules, communication, delivery of the product and decisions on implementation.
- Experience in code review and demos.
- Investigation, design, and implement scalable applications for data identification, analysis, retrieval, and indexing.
- Develop high-quality software design and architecture.
- Identify, prioritize, and execute tasks in the software development life cycle.
- Develop tools and applications by producing clean, efficient code.
- Automate tasks through proper tools and scripting.

Senior Software Engineer (React/.NET Core) - 01/2018-09/2021
Brain Digit IT Solutions

As a team we developed a full-fledged Learning Management System/e-learning platform from scratch in which we used React framework with Material-UI for front-end and .NET Core framework as a back-end technology, MSSQL for storing for relational data and MongoDB for storing our log data.

- Software design and development while staying concentrated on client needs.
- Mentoring junior developers with their work, issues, and attendance.
- Supplying status updates every week and keeping a smooth work environment among the team members.
- Involved in decision making about the project's modules like breaking the modules in stories.
- Interface with business analysts, developers, and technical support to figure out best specifications.

Software Engineer (Angular/Dapper.Net) - 06/2015 to 01/2018
Shangrila MicroSystem

Started as an intern and gradually promoted as a software engineer. We developed a Taxation system (Enterprise Resource Planning Software) and International Airport Flight Schedule Management system, using Angular and ExtJS front-end framework, Asp.Net Web API backend framework, Dapper.net for Object Relational Mapping and PostgreSQL for storing relational data. Experienced working with Angular, .Net Core, Nodejs, JavaScript, JQuery, Typescript, PostgreSQL for about three and half years.

- Consulted regularly with customers on project status, proposals, and technical issues.
- Transformed existing software to correct errors, upgrade interfaces, and improve efficiency.
- Cooperate diligently with other IT team members to plan, design, and develop smart solutions.
- Write modular, secure, and well-tested front-end code in JavaScript framework.
- Perform tasks efficiently and collaborate with the team to ensure project success.

Education

Bachelors in information management: **Computer Engineering - 2015**
